

Note.

ECFS, when filings are made use a standard Google Chrome browser on a standard Mac computer, does not give a receipt after the filing is submitted. This appears to be a deficiency in the ECFS system.

Today, May 23, 2013, I attempted to upload a filing in this docket 11-71, with two attachments, using the Browser noted above. After submitting the filing, no filing receipt was issued, but instead the filing cover page reappeared.

Thus, I assume the filing may not have been received, and filings do not immediately show up in ECFS. Thus, I am now submitting the filing again, this time using the Safari browser. The filing contains, as uploads, the following PDF files:

- "Errata, Opp to Maritime MSD.pdf" and
- "14.0 Choctaw as agent and co-controller of MCLM licenses after Bankruptcy Ct approval of Ch 11 Plan.pdf" [ECFS may truncate this name. Names created in Mac OS can be long. Names create on other OS must be shorter.]
- W. Havens
